The participants were very interested in the theme and this was why the audience, which was a group out of teachers, initial teacher educators and adult educators, discussed in the last hour very intensive how they imagine implementing parts of the project into their daily work life.

Out of the organisers' point of view the conference was very successful as the participants gained new knowledge about European projects and in particular about the DYACIT project.

The general presentation of the DYACIT project was made with the help of flip charts. The crucial evaluation aspects were presented by a PowerPoint presentation.
